Project: Folic Acid Ambassador Program

*****Below are excerpts from their final report*****

About the Project: Twelve Sister Love participants were trained as Community Ambassadors to promote the use of folic acid. The Sister Love program has been successful in helping to reduce the rate of infant mortality in Lee County among African American women. Community Ambassadors will help spread the word about the importance of folic acid.

Successes: This grant made it possible for the Sister Love program to reach its goal of giving informative health information to African American women of childbearing age.
